MONTHLY NET SALES

READING THE RHYTHM

October reached \$61,513, 12% of the year in a single month.

The low point came in June at \$27,583. Sales then rebounded 74.4% in July, showing that the mid-year trough was sharp rather than persistent.

QUARTERLY FLOW

The portfolio

A concentrated engine: premium workspace products carry the commercial story.

CATEGORY COMPOSITION

Two categories create nearly the whole horizon.

91.8%

of net sales came from Electronics and Furniture, despite representing only 60.1% of orders.

The portfolio is value-led rather than volume-led: Stationery produced 815 units but only 1.6% of revenue.

PRODUCT CONSTELLATION · TOP EIGHT

55.5%

The top three products—Standing Desk, Ergonomic Chair and Monitor 27in—generated more than half of all net sales. This creates focus, but also concentration risk.

The market

Balanced routes to market; less balanced geography.

REGIONAL TIDE

ROUTES TO CUSTOMER

Online

35.9%

338 orders · \$183,346

Retail

32.3%

324 orders · \$164,938

Wholesale

31.9%

338 orders · \$162,757

South leads East by \$35,567.

Yet order counts are broadly similar. The gap is primarily ticket size: South averaged \$591 per order versus \$420 in East.

SEGMENT EQUILIBRIUM

Consumer

34.7%

334 orders · \$177,314

Enterprise

34.2%

319 orders · \$174,698

SMB

31.1%

347 orders · \$159,028

01

The most useful expansion question is not “which channel?”—channel shares differ by only four points. It is “how do we raise East’s order value without disturbing the healthy channel mix?”

04

ANNUAL SALES REPORT

The craft

Performance lives in the space between reach, pricing discipline and human execution.

SALES TEAM

F. Oyelaran led with \$104,412, 20.4% of annual net sales. The remaining five representatives sit within a comparatively narrow \$11,437 band.

THE DISCOUNT SLOPE

Orders discounted 16-20% averaged \$376, 32.2% below undiscounted orders. This is descriptive, not causal—but it argues for testing discount thresholds carefully.

THREE MOVES FOR THE NEXT CYCLE

01

Protect the engine

Monitor availability, pricing and attach-rate around the three products that create 55.5% of revenue.

02

Lift the East

Use South's basket mix as a benchmark and test bundles that raise East's order value rather than simply chasing more orders.

03

Learn from October

Decompose the peak month by product, region and rep; turn the repeatable ingredients into a focused autumn playbook.

A SINGLE ORDER, IN RELIEF

The year's largest order was \$3,990: Standing Desk for Robert Nguyen in Central on 2024-11-23.

METHOD

Computed directly from sample_sales_data.csv. Net sales are summed from net_amount; discounts equal gross_amount minus net_amount. Customer count uses distinct customer strings. Percentages may not sum to 100.0% because of rounding. This report describes revenue, not profit or causality.
